WHO AM I?

Hello world, I am a 21 year old student enrolled at the University of Cologne, studying Business Informatics. I was born in Sweden (Lulea) and my parents are from Lithuania and South Korea, but I grew up in Germany. My passion for software development started in school during a Java subject and fully ignited during my studies at university. My aim is to become a better software developer, by gaining experiences in as many areas of software development as possible. When I'm not programming or studying, I like to spend my time meeting friends and playing football.

Java
Java-/TypeScript
Python
Terraform
Bash
PHP
SQL
C++

git   Linux   Docker   Argo CD   Pipelines   Helm   K8s   Azure
